JIS Journal of Interdisciplinary Sciences (JIS)

Vision

"ENRICHING BEAUTIFUL MINDS TOWARDS INTELLIGENT MINDS"

The Journal of Interdisciplinary Sciences (JIS) aims to disseminate scholarly research articles and papers to the wider community with the aim of offering an academic and scientific platform that provides an outlet to authors. The Journal of Interdisciplinary Sciences (JIS) is an open access online journal. Initially, the JIS will provide an online version, but is planning a print version later in this academic journey. The Journal of Interdisciplinary Sciences (JIS) focuses on a high-quality academic research articles and papers. All categories of research are of interest to the JIS, including insightful empirical studies, conceptual papers, commentary, essays, and theoretical articles.

JIS is an interdisciplinary platform and invites authors, academics, students, researchers, leaders, managers, scientists for their contributions in the disciplines of sciences, sociology, education, philosophy, humanities and management. Articles and Papers of scientific and academic rigour in Qualitative, Quantitative, Mixed or Blend methods are welcome.

JIS intends to publish two issues per annum (May and November).

Submissions to, and Publication in, the JIS is free.

All papers submitted for publication will be peer-reviewed.

Journal of Interdisciplinary Sciences (JIS)

mission is to **"Guide Beautiful Minds towards Intellectual Enrichment"**

Editorial

Dear Readers,

We are pleased to announce the publication of Volume 10, Issue 2, November 2026. We have been proud to support academic contributions since 2017, providing a no-charge platform for the scientific community. Our publisher, ORDT: Organization for Research Development and Training, which is also a social organization contributing to education and academic enrichment with a not-for-profit intention, has been very supportive. We will be completing our tenth year of publication contributions, during which many authors have trusted us for our confidence and reliability. Our Google Scholar citation index is increasing, validating our publications.

In this issue, we bring you a few articles of academic standard. Although we receive many articles, only about 30%-40% are published, and most, about 60%-70 %, are rejected. This also validates our commitment to academic integrity. So far, our dedication has been visible worldwide being indexed by reputed indexes such as DOAJ, JUFO, NSD-Norwegian Register and others. In recent years, articles published in the Journal of Interdisciplinary Sciences (JIS) have been remarkably cited by authors around the world, which can also be validated through the Google Scholar scientific indexing platform.

In this November issue, JIS is publishing a few articles of academic and scientific standards- not because of low submissions, but to maintain the academic standard. The publication of this November issue (Volume 10) marks the completion of the tenth year of online publication history. We are incredibly proud to share this milestone with our authors, reviewers, and readers, whose vital contributions make our work possible. As we look ahead, we remain deeply committed to advancing our scientific journey for another ten years, which will contribute additional knowledge to the academic community. We believe that dissemination of knowledge through publication will create additional new knowledge, and JIS is glad to serve as a nonprofit academic platform

Our next volume will be published in May 2027, and we invite authors from multi- and interdisciplinary sciences to submit their original scientific and academic papers. Thank you very much,

Let us join and collaborate together to **ENRICH the BEAUTIFUL MINDS TOWARDS INTELLIGENT MINDS**
